Hard Skills: Technical support skills, Platform administration, H5P content creation (Moodle), Financial administration

Soft Skills: Strong Communication and Teamwork abilities, Project management, Creativity, Customer Service, Office management, Detailed-oriented and Organized

Professional History

Technology Assessor | *Institute for the Comprehensive Training of the Deaf, Mexico* | Jan 2021 – July 2024

- Administered Moodle platform to provide high quality Mexican Sign Language courses to over 20 people per module.
- Created eLearning content using the H5P framework to make the course more interactive and more hands-on using the latest media so that students can learn the language in an interactive way.
- As a result, the alumni were able to establish a conversation under different circumstances.

Financial Assistant | *Recoveraid Recovery Solutions Inc., Canada* | Dec 2021 – Oct 2022

- Developed financial reports based on collected data from invoices and financial documents.
- To create a database that will show the yearly financial development of the company, before tax season.

- Use Microsoft Excel to create datasheets and keep records of the collected data.
- After submitting the tax forms, the company did not have to pay anything, and the balance was in its favor.

IT Technician | *Mexican government, Mexico* | Jan 2020 – Feb 2021

- During this apprenticeship I applied TICs in general, as well as HTML, CSS, JS, and Bootstrap frameworks, to develop Mexico City's 2021 Protection Civil webpage.
- The website was designed to access basic information related to natural disasters, more easily.
- As a result, this website contains what every Mexico City citizen needs to know during a natural disaster event.

Homologation Engineer | *Samsung Electronics Mexico, Mexico* | Dec 2016 – Apr 2017

- As a Homologation Engineer, I approved the correct functioning of cellular equipment and tablets.
- Use of specialized software to detect bugs and errors on logs.
- As a result, my technical skills helped me during the Homologation of the S8 model for Mexico, making sure that the user interface was ready for customers.
